Year Built	1963	Build No.	
Beam		Hull Construction	Double diagonal teak
Draft		Deck Construction	
Engine Make	Twin BMW	Superstructure Style	
Engine Size		Number of Berths	
Engine Fuel Type	Diesel	Location	Windsor Marina

History

	Believed twin Chrysler Crown engines (petrol) were the original engines.
	Built 36' on the 33' jigs, but see below form Terry Dann.
	Originally powered by Newage "Sea Princess" 6 Cylinder Petrol engines with electric shift gearboxes.

1964	Built for the 1964 Boat Show at Earls Court.
19 Sep 1981	Commander J M Collard, (RN) of Ashprington, Devon.
1996	Seen in Epernay, France.
2002	For sale, Seaway Marine England, on brokerage for 27k.
2002	Moored River Marne, France.
	Lloyds 377202.
Jan 2018	<p>Per Terry Dann: She (Musidora) is definitely 35'. We brought her back from France - around 2004/2005 - and had her on hard standing at Bates Marine Wharf. We then moved her to where she is now, Penton Hook Marina, Chertsey.</p> <p>I did my apprenticeship at Bates from 1961 so have worked on all the Starcraft after that date. I decided to restore one myself so have been working on Musidora whilst carrying on my boatbuilding business so it has been a slow process.</p>
2020	Per Sarah Woolley (SCOC membership secretary): She has been sold and is now owned by Neil and Jeanette Pearson of Whitby and is moored at Windsor Marina.
2022	Currently at Dennett's yard where the aft cabin is being removed to form an open seating area. She will then be moved to York (source: Sarah Woolley).
